## Objective

Highly motivated and detail-oriented Java developer with a strong foundation in object-oriented programming. Strong problem-solving skills and ability to work well in a team. Seeking an opportunity to leverage my skills and contribute to the success of an innovative organization

## Projects

### Employee Management System

Created Single-page applications using agile methodology with Spring boot, Angular and Java 17. Can add, remove, view, and update employee details.

### Online Filing Cabinet using Web Development

The details and certificates of the faculties are maintained manually by themselves. They do not carry the documents everywhere. To convert this manual process into digitalized form. We created an application which stores all the details of the faculty.

### MEDPLANT - Herbal Plant Detection using Mobile net v2 Deep Learning Model

To develop a mobile net v2 deep learning model for herbal plants identification and to evaluate our proposed model with Resnet, Inception and Alexnet based deep learning models.

## Achievements

Completed a four-month Java Full Stack Developer Program at Edubridge Learning, starting from August 28,2023 to December 31,2023.

Completed a two days workshop on "Android Development Workshop" conducted by UCE Trichy held on Feb 10th & 11th organized by Department of Computer Applications of BIT, Trichy.
